
JUNIOR DESIGNER

INDUSTRIAL DESIGN

Munich | full time | flexible working time and place

We are looking for an **Industrial Designer** (m/f/d), who seeks to bridge the physical and digital world to make innovation haptic, perceptible and beautiful.

You should have some experience in designing products and have a keen eye for beauty and simplicity. A user-centric way of thinking is essential for your work. But you also need to be able to see the bigger picture and the large context behind the things we conceive and build.

To apply, write a short email to jobs@wyte.io with the following information:

- Your CV
 - Some examples of projects you have worked on (private projects or work, as far as you are allowed to share with us)
 - 420 words about what sets you apart from anyone else. This does **NOT** need to be related to your work. What we are interested in is your personality.
 - You can keep your grades to yourself, they are not relevant here.
-

Who is Wyte?

Wyte is a collective of entrepreneurs unlocking innovation at corporates. We call this startup-as-a-service. Together, we make change happen in both digital and technical domains. We follow an approach related to human-centric design and mix people with very different backgrounds to create products and services that work. We also develop our own products, just like a start-up.

Working at Wyte is all about evolving creatively and growing personally, whilst making a change to the world. Both in the big and the small way. You will be working in a young company with open-minded people ready to break with the status quo. Of course, we work hard at times, which does not necessarily mean long hours. Great ideas need contemplative moments of pause and reflection to flourish. Hence, we encourage both a good work-life balance as well as the self-responsibility to stimulate inspiration.

What you will be doing

As an industrial designer, you will be responsible for design in both external and internal projects bringing in your own ideas and expertise. As a creative yet self-organised person, you will take responsibility for your own areas of work and push those forward. Your most important tasks will be:

1. Designing mockups and building prototypes, or in other words, making ideas visible and tangible
2. Going out of the office and getting your hands dirty, collecting user feedback and translating this into product concepts
3. Bringing together people of different backgrounds and with different views on design in order to trigger new thoughts and exemplify a visual language simple and in a warm manner

Your experience and education

We empower a culture of diversity and inclusion, self-taught abilities, and creative thinking. We admire people who are ready to challenge themselves and others. This needs everyone to embrace different points of view and find joint solutions in discourse. For the job to be a perfect fit, some of the things listed below should apply to you:

- University Degree in Industrial Design or similar work experience
- At least two years of experience in actually building stuff and delivering it to market (of course, start-ups do count)
- A strong sense for products and empathy for its users
- Profound understanding of your domain, relevant tools and methodology
- A hands-on mindset and a sense for craftsmanship
- Great communication skills, **fluent in German and English**
- Experience in human-centred design
- Ideally some entrepreneurial experience (failures are especially cool)

You should have the following kind of mindset

We are especially interested in candidates that are multidimensional. In other words, they combine very different competencies and talents in one person. We are looking for the unusual and apparently conflicting individual. These points make you even more interesting:

- Unorthodox thinking
- Don't cling to status quo
- Open for change, do things all over again
- A fascination for new materials, techniques, approaches to design
- Like to break things
- Do things differently
- Artistic sensitivity
- High interest and self-propulsion to learn

- Humor and don't take everything too seriously
